Field Specialist Technician, Irrigation Specialist

Req: 23-04

RECON Environmental is a small company of specialists representing one of the most established environmental consulting service firms in the Southwest. We are employee owned and hard-working, but with a casual and collaborative work environment. We offer the right candidate a team-oriented, caring environment that is client-focused, flexible, and always striving to provide high-quality service to our clients.

Due to our continued growth, we are looking to add an Irrigation Specialist to our Restoration division. When not performing Irrigation, the position will perform work as Habitat Restoration Field Technician.

Minimum Qualifications

- The Irrigation Specialist will possess technical skills for design, retrofitting and installing various types of irrigation systems and operations.
- Requires experience with different types of controllers, booster pumps; ability to operate trenching equipment.
- Must be able to read and implement irrigation plans.
- Must have a valid California Driver's License and a history of safe driving (DMV check prior to hire).
- Bilingual English/Spanish is highly desirable.
- Will assist with estimating the installation and maintenance of irrigation systems for future projects.
- As a field technician, will be required to stand, stoop, and bend for extended periods of time and work in environments of fluctuating temperatures.
- This position requires the candidate to be able to lift up to 50 pounds.
- On occasion candidate must be available to travel to areas outside of Southern California (Monday – Friday).

The ideal candidate will be flexible and adaptable to the various types of work RECON conducts including but not limited to implementation and maintenance of ecological restoration projects guided by RECON project biologists (field work requiring standing, stooping, and bending for extended periods of time in environments of fluctuating temperatures).
